Millions of people in desperate need of help,  
While the west provides financial support - only  
upkeeping  
Raging civil wars. The blind leading the clueless,  
Trying to pull the land out of it's economic miasma.  
But instead of increasing development, foreign  
assistance  
Created dependence. Creating a lower standard  
Of living, supporting their regime. Turning their back to  
The facts of cruel leadership schemes. Grinding  
poverty  
Amidst immense riches. Raped and tortured civilians  
Due to embezzled financial assistance.
