"Tearing International Treaties"

Visit "[Tearing International Treaties](#)" on MotoLyrics.com

The worlds most industrialized countries have
Agreed to cooperate, to cut their greenhouse
emissions.

We face the biggest threat of the planet today
Yet the biggest polluter refuses and actively works
Against the efforts of making the world a better place.
They continue to deny the facts of climate change.
Suppressing the solutions to their people. Tearing up
International treaties. there's no money in the air that
We breathe. No responsibility of the consequences is
Taken as long as their bank-balance is not affected.
The biggest polluter refuses to try to make the world
A better place.
