"Hey Little Airplane"

Visit "[Hey Little Airplane](#)" on MotoLyrics.com

Can you ask a big jet to listen
Wave goodbye to the cares of the day
A million mirrors turning their heads now
Lose the ground; we're up and away..
A secret bag for passports and cash
A bottle of aspirin® to chew in the crash
A lift into the silence above
It's alright, let's fly.!

Hey little airplane!
Do you know where you're going to take me?
Hey little airplane!
You know you're always getting it your way.!

Balanced on the tip of the mountain
Unknown people all around
Don't you think that we've been up for too long?
Still, I'll never want to come down..
But, it's all a false solution
Back to rags and revolution
One place is as bad as another
Oh, man.. We're gonna land.!

Hey, little airplane
Do you know where you're going to take me?
Hey, little airplane
Do you know you're always gettin' it your way!
Hey, little airplane
Do you know where you're gonna take me?

Above the clouds
It's a beautiful day forever
Above the clouds
The day will last forever

Hey, little airplane ...
