I can see me loving you, you can show me how  
There is nothing I won't do, we can start right now  
I can see me lov'in you when we're old and grey  
Ups and downs or joys and blues, laughing all the way  
Born into this world of darkness every child will be  
Always reaching towards the light  
Every living breathing soul unfolds this mystery  
Gently rolling to that good night  
I can see me loving you  
See you loving me  
In each moment shining through eternity  
Take my hand and walk with me, our love will abide  
Past the point of no return to the other side  
Might wakeup someday and wonder what life's come to  
Is this good as love can be?  
All I know is from the moment I laid eyes on you  
You're as far as I can see  
I can see me loving you  
See you loving me  
In each moment shining through all eternity
