"Bullet Proof"

No one ever said it would be easy
Sometimes I wish it wouldn't be so hard
In a lie of every days disappointments
She finds the way and picks me up and here the pain
She straps away of the confusion
Leaves me making the solution

[CHORUS:]

She brings me down to a softer landing
She turns me round to an understanding
Love life and a truth, and a heart that's beautiful
And bullet proof and bullet proof

The heart of every night you find the answer
When you stop looking to find the stare every time
But let's concede we'll never find perfection
When all it said it down is what you feel not staring at
the sun
She straps away of the confusion
Leaves me making the solution

[CHORUS]

[BRIDGE:]

Somehow she gives me
A strayed I never knew existed
Somehow she takes me
To a better place than this
A better place than this

[CHORUS 2x]
