This town don't care never cared about you and me
Turn around and around and around keep trying but
we never break free
Well watched my poppa get old, long before his hair
was turning grey
This place is a suicide trap, bought a one way ticket
and were never coming back

She said I'm leaving so far away

Your mama can wait by the telephone, but you aint
gonna call
Say you wanna run but you never go, cuz your too
afraid to fall
You and me girl we gotta get away, cuz nothings gonna
change until we get somewhere
Get in my car and we'll drive all night, as long as were
together it'll be alright

So come on baby take my hand, and hold up steady
when you shoot your gun
This town can burn and fall apart, I don't even care,
baby we can run tonight

Last chance if you wanna go home baby girl this is the
end of the line
And you know you'll break your mamas heart in two,
when you don't come home tonight
I don't wanna die in this place another broken down
soldier too lost to weary too fight
And someday
Wonder bout that girl and wonder what if I took my
chance on a runaway dance
