It's a Friday night
And I'm going to the liquor store
To stock up on everything that
Makes us feel like we're floating on clouds for tonight

A single breath, and a beating heart
Could take me there without a doubt
And my body's growing weak now
From my hands until my feet
I can feel your touch, we're all alone
It's time to open up

Allison, you only got one first impression
Maybe you're what I've been missing
Maybe you're what I wanted oh oh oh all along
Allison, you only got one first impression
Maybe you're what I've been missing
Maybe you're what I wanted oh oh oh all along

Oh oh oh oh oh oh all along
Oh ooh oh oh all along

It's a moonlit sky and it's fading fast
The morning sun is all we have
And still we leave this dream world behind
And remember read the street signs
Of where we met, on the road again, you're still in my
head
Wishing you we're still here with me
This feelings undeserving
You're gone again, you came and went
See you at summers end

Allison, you only got one first impression
Maybe you're what I've been missing
Maybe you're what I wanted oh oh oh all along
Allison, you only got one first impression
Maybe you're what I've been missing
Maybe you're what I wanted oh oh oh all along

A millionaire with long brown hair
She tells me what to wear

She tells me what to say
And sometimes even what to do
But there's something about her
There's something about the way she looked at me
today
I never want this feeling to ever go away

Allison, you only got one first impression
Maybe you're what I've been missing
Maybe you're what I wanted oh oh oh all along
Allison, you only got one first impression
Maybe you're what I've been missing
Maybe you're what I wanted oh oh oh all along

Allison, you only got one first impression
Maybe you're what I've been missing
Maybe you're what I wanted oh oh oh all along
Allison, you only got one first impression
Maybe you're what I've been missing
Maybe you're what I wanted oh oh oh all along

(Allison, you only got one first impression
Maybe you're what I've been missing
Maybe you're what I wanted)
