### **"Leaving You"**

Visit "[Leaving You](http://MotoLyrics.com)" on [MotoLyrics.com](http://MotoLyrics.com)

Sometimes I wish that I was dead  
Cause thoughts and emotions  
Never stop running through my head  
And you said  
You would never be there for me again

I'll leave as long as you let me go  
I'm choking on this leash  
You had me for weeks  
And I'm dying to get it off  
Alone is the way to go  
On the way to the top

Believe me when I tell you  
I think I'm over needing you  
But there's one thing  
I want you to know

I wanna go back to when we first met  
I'm dying to get this off my chest  
Cause I loved you all along  
And I know that I was wrong for leaving you

Sometimes when I'm driving all alone  
I'm wondering if I call you  
If you'll pick up your phone  
And we'll talk about everything  
How I spent this last year wondering  
What's wrong with me

I know there's nothing I can do  
To change the life you're living  
Or even change mine too  
I'll try to keep an open mind  
And hope that someday  
You'll come back into my life

Believe me when I tell you  
That I'm not over wanting you  
But there's one thing  
I want you to know

I wanna go back to when we first met  
I'm dying to get this off my chest  
Cause I loved you all along  
And I know that I was wrong for leaving you

Back to where we first met  
I'm dying to get this off my chest  
Cause I loved you all along  
And I know that I was wrong for leaving you

Forever you said it  
But you never really meant it  
I'm done with pretending  
That you're gonna be here someday

On, and on, and over your head again (x3)

On, and on, and over your head again (x3)

I wanna go back to when we first met  
I'm dying to get this off my chest  
Cause I loved you all along  
And I know that I was wrong for leaving you

Back to where we first met  
I'm dying to get this off my chest  
Cause I loved you all along  
And I know that I was wrong for leaving you

And I know that I was wrong for leaving you (x2)
