# "Starts With Them, Ends With Us"

Visit "[Starts With Them, Ends With Us](#)" on MotoLyrics.com

Don't speak  
Don't speak until you've caught your breathe  
Don't sleep  
Don't sleep unless you're safe in bed

Just pray in the night they take someone instead  
The hills are alive with the sounds of your head

Please dear  
Please dear be sure of us and ours  
Don't fear  
Don't fear the worst in case it comes

Just pray in the night that they don't take your love  
The hills are alive with the sounds of their guns  
You're getting use to 'em

What happens next  
What happens next  
East to west  
Lunatics

And it started slow  
Ends in a rush  
Starts with them  
And ends with us

Just pray in the night these walls are enough  
The hills are alive and the rivers show blood  
The cancer is wide and it's taken my trust  
Do what we will and we will what we must
