Too many times I've been pushed aside  
To better yourself, to justify  
Your higher being that makes you better  
Than everyone and everything, your everything

This goes out to everyone who thought  
we'd all maintain through thick and thin  
You've proved me wrong, You've prove us wrong  
we once were friends, but now its fucking gone

Now that I've seen your true face  
I don't like what I see  
We once, we once were friends  
But now it's all gone  
Its all gone
