Though I didn't mention
I prayed for you that day
You left Glasco and your shell
And sailed back to the bay
And though it was predicted
Old times always sound so bad
The calendar was the saddest thing
That I ever read
I hope you know you'll always be the life the party
I hope you know you'll always be the life the party
Though I wouldn't mention
I still say how do you
Know you wonder if the timing's off
How I want you too
Though we lost direction
Bad times always seem so sweet
You push the rythmn but kept uphill
The heart was made of steel
I hope you know you'll always be the life the party
I hope you know you'll always be the life the party
Who knows? I know it's our last show
And I hope you know you'll always be
Always be...
One heart it stays racing on
Come on friend
There's poison in your veins
Come on friend
You know I feel the same
I hope you know you'll always be the life the party
I hope you know you'll always be the life the party
Who knows? I know it's our last show
I hope you know there never was a party at all
