I do to you
What you want me to

Here they come
Here they come
Hear them come

Hey sister, bright sister
Find another way to speak
Speak your mind
If they don't listen to you
Try sister, sly sister
To find another fate to cheat
One that won't hurt
If they don't listen to your speak

If you speak
Speak your mind
If you speak
Use your mind
It's your time

I may be telling you the wrong views
I could be teaching from the wrong schools
You could be reaching for the ceiling
This could be confidence for fools
How do you choose

It's your shake
(What are you gonna)
Now shake in time
(What are you gonna)
Take your step
(What are you gonna)
Up to the line
(Do down there)
It's your take
Now take your time
It's your shake
(What are you gonna)
Now shake in time
(What are you gonna)

Take your step
(What are you gonna)

Up to the line

Hey sister
Whoa sister
Get up off your hands and knees
Show your mind
Did they forget to ask you
Please sister, oh please sister
Your money isn't quite that blue
Give some head
Hey sister this is how you bruise

If you speak
Then speak your mind
Use your head
Not your behind
Use your mind

You may be showing us the wrong view
You could be learning from the wrong schools
You should be hanging from the ceiling
It should be confidential

It's your shake
(What are you gonna)
Now shake in time
(What are you gonna)
Take your step
(What are you gonna)
Up to the line
(Do down there)
It's your take
Now take your time
It's your shake
(What are you gonna)
Now shake in time
(What are you gonna)
Take your step up
(What are you gonna)
To the line

It should be confidential
