If you got a girl you should treat her kind  
Always give a loving sign to let her know  
Take out onto the town, you could be a funny clown  
If she wants to laugh

### CHORUS

'Cause love will see you through  
It's got to make things new  
The future could be good  
You've got to and it should

Suddenly she misunderstands  
Takes her tears and then she ran down the hall  
Promise her anything, wedding ring, anything  
Before she goes

### CHORUS

You could have some kids  
Just like Dad and Mommy did so long ago

But tomorrows could be so bright  
Way out, way out of sight if you're wise  
'Cause love will see you through  
It's got to make things new  
The future could be good  
You've got to and you should

Always keep your heart in tune  
Don't leave bad habits laying around for her to see  
Always do the best you can  
And you'll be a happy man, wait and see

### CHORUS
