Tonight must be a magic night
Cause I can see stars falling in your eyes
Tonight must be a magic night
Cause I can hear thunder in each and every heartbeat
I know it sounds crazy
But dreams are coming true
Standing here with you
Everytime you smile at me angels walk on through
I'm ready now to go
I'm ready now to follow my heart
Chances are we're gonna make it through
If you believe it too
That dreams are coming true
Tonight must be a magic night
Cause I can feel your love
Reaching to embrace me
And baby when you take my hand I understand
This love is all or nothing
This love is here and now
I know it sounds crazy
But dreams are coming true
Standing here with you
Everytime you smile at me angels walk on through
I'm ready now to go
I'm ready now to follow my heart, follow my heart
I was lost and gone forever till I found myself tonight
Back into the light
Cause I never stopped believing
Dreams are coming true
Dreams are coming true
Standing here with you
Everytime you smile at me angels walk on through
I'm ready now to go
I'm ready now to follow my heart
Chances are we're gonna make it through
If you believe it too
That dreams are coming true
Cause I'm standing here tonight with you
