Baby it's a dream come true
Being here with you
You don't need to say a thing
I know how you feel
'Cause I feel it too

Look into my eyes right now
And tell me what you see
All of my body wants you
For every breath I take
My heart is calling out your name

Baby it's a miracle
A dream that never ends
I wanna stay like this forever
With you, right here, right now
If I could stop the time
I'd hold it right now
With my lips touching yours
My skin touching your skin
A miracle called love

Suddenly I feel alive
I open up my eyes
I am way up in the sky
Come baby fly with me
Let's try to reach the stars
(It's so beautiful)

Baby it's a miracle...
