Won't you tell me where I stand
Coz there's things I have planned
If all my days are ruined by words then I can't find my
heart
I hope you got it wrong
Coz I can't take more of these words
I'll hold on in hope

And I think how many years
Have I filled my days with tears
But I can't lie so I just smile so things seem right
I hope you got it wrong
Coz I can't take more of these words
I'll hold on in hope

But I can't hide as people lie
They make me cry but I just smile
But I can't hide as people lie
They make me cry but I just smile
Words I can whisper
But actions I can't hide
So stay for a while don't talk for a while
Coz words will only break my heart.
Break my heart
Coz words will only break my heart

I know you got it wrong
Coz I can't take more of these words
I'll hold on in hope
But I can't hide and people lie
They make me cry but I just smile
But I can't hide as people lie
They make me cry but I just smile
I can't speak you read the team,
Your words they live to burn my dreams
But I can't hide as people lie
They make me cry but I just smile
