She's not what you think  
She's just here for the taking  
Out all night, catching flights last minute  
She's got bigger dreams  
She's not what she might seem  
Out of town, running around the city

Cause it's just the way she lives  
The only way she knows how  
She'll take and she'll give  
Oh, it's just the way she lives  
It's the only way she knows how  
She'll take and she'll give  
She'll take and she'll give

Coming home way too late

The sun's already shining  
She don't care  
You don't know what she's finding  
Out on the road all day  
Driving on down that highway  
She don't care nothing about what they say

Cause it's just the way she lives  
The only way she knows how  
She'll take and she'll give  
Oh, it's just the way she lives  
It's the only way she knows how  
She'll take and she'll give  
She'll take and she'll give
