1st verse

Anne just hit the wall,
she couldn't eat it all,
99 pies a day,
and another ones on the way,
her food went out the door,
when she hit 904,
always been that same way,
never skinny for a single day,
she wanted to eat it all,
she wanted it really bad,
but when she got it taken away,
she got really mad,
she'd fight you hard for food,
i heard she once killed a dude,
look at her stomach now,
its gettin' bigger, bigger all night!!!

chorus

she would eat chicken and cookies and some foods
that weren't cooked yet,
she'd eat fish bait and cornflakes and say she wasn't
over weight, she'll try diets that won't last (alternate)
1st for losing weight she's far past 2nd come on have
you seen her
\$#@ but she's still hungry my friend over, over, way,
way, overweight

2nd verse

she's tried all the diets,
she's tried every one, she's tried to lose it all,
but she's got enormus buns,
she's gone out and ran,
but she's not a very big fan,
thought she mite get a hand,
if she became like that Richard Simmons man,
what happened to the pie with blueberries,
and what is up with her cuttin' back on daries,
when did her stomach become like a baloon,
what happened to desernment and moderation for her
tummy tum

chorus

she would eat chicken and cookies and some foods
that weren't cooked yet,
she'd eat fish bait and cornflakes and say she wasn't
overweight,
she'll try diets they won't last (alternate) 1st for losing
weight she's far past 2nd come on have you seen her
%@#,
but she's still hungry my friend over, over, way, way,
overweight

ending

she loves food,
won't say stop,
her stomachs like a waterballoon and all it does is kinda
flops,
I often wonder why she let go,
maybe it's because she can't...say...NO!!

chorus

And she ould eat chicken and cookies and some foods
that weren't cooked yet,
she's eat fish bait and cornflakes and say she wasn't
overweight,
she'll try diets they won't last (alternate) 1st for losing
weight she's far past 2nd come on have you seen her
@!%,
but she's still hungry my friend and she's overweight.
