I was the one
Who had shit for brains
(Had shit for brains)
I never took the time to notice
That I was always wrong and you weren't
You were the one who gave up so many things
Took you for granted
But you understood
It was just a phase

And I've got a new direction
A blueprint for erection of a new life
It's such a simple situation
Some kind of masturbation
With a new twist
I don't know why

I've got it all figured out
We can make it
And I'll never let you down
Just take my hand
And understand
There's a lot of tomorrows

I let you down
You had no complaints
Watched as the world went spinnin'
Around without you
You waited for me
You wanted diamonds
I came up with rollerblades
Shot down again but you smiled
And shook your head
And knew that I had changed

And I've got a new direction
A blueprint for erection of a new life
It's such a simple situation
Some kind of masturbation
With a new twist
I don't know why

I've got it all figured out
We can make it
And I'll never let you down
Just take my hand
And understand
There's a lot of tomorrows

Just take my hand
And understand
There's a lot of tomorrows

I was the one
Who had shit for brains
(Had shit for brains)
I never took the time to notice
That I was always wrong and you weren't
You were the one who gave up so many things
Took you for granted
But you understood

Now I've got it all figured out
We can make it
And I'll never let you down
Just take my hand
And understand
There's a lot of tomorrows

I've got it all figured out
We can make it
And I'll never let you down
Just take my hand
And understand
There's a lot of tomorrows

I've got it all figured out
We can make it
And I'll never let you down
Just take my hand
And understand
There's a lot of tomorrows

I've got it all figured out
We can make it
And I'll never let you down
Just take my hand
And understand
There's a lot of tomorrows

I've got it all figured out
We can make it

And I'll never let you down
Just take my hand
And understand
There's a lot of tomorrows

I've got it all figured out
I've got it all figured out
I've got it all figured out
I've got it all figured out
I've got it all figured out
I've got it all figured out
I've got it all figured out
I've got it all figured out
