"The fear of blood tends to create fear for the flesh."  
Since my birth, haunting visions  
Have occurred to me  
A strange power  
Controlling my destiny  
Burned in the fire  
But my blackened soul has remained  
My dark desire  
Will infect this mortal plane  
Lying here, left for dead  
Bandaged and alone  
A separate half I'll create  
To undermine their throne  
Feel your aggression  
The taste of my hate inside of you  
Feeds my obsession  
Until the time you set me free  
This was meant to be

[Chorus:]  
Searching in my mind  
Answers I seek to find  
Oh to know the truth  
Why my nightmares have  
Come to life  
How can I go on  
Left to be on my own  
Waiting for the day  
To close my eyes and leave this  
World... alone?  
Remember me, your true self  
It's who you must become  
You and I, are one and the same  
The Chosen One  
Rock turn to rust  
My minions rise and humanity  
All turns to dust  
None will ever stop my insanity  
Banish it to the void  
Seal your fate at once  
Let the light take you in  
See it through

I am immortal  
Even if I'm wiped away  
I can't be stopped, no  
My influence has spread  
Your kind is dead

[Chorus:]  
Searching in my mind  
Answers I seek to find  
Oh to know the truth  
Why my nightmares have  
Come to life  
How can I go on  
Left to be on my own  
Waiting for the day  
To close my eyes and leave this  
World... alone?

[Solo]

[Chorus:]  
Searching in my mind  
All the answers now are mine  
Now I know the truth you're  
Still a part of me  
Now can I go on  
A soul divided now made whole  
Waiting for the day  
To close my eyes but I am  
Not alone!  
Waiting for the day  
To close my eyes but I am  
Not alone
