Well it's a video party sleepover
Yeah we're gonna stay up all night
It's a video party sleepover
Yeah we're gonna stay up all night

Welcome to the hour
The prophecy of pixel power
Hits you harder than a doctor's bill
If the bag is ripped then the beans will spill

But on the air to the lounge chair
Our skin is pale and our eyes are square

Well it's a video party sleepover
Yeah we're gonna stay up all night
It's a video party sleepover
Yeah we're gonna stay up all night

There'll be many nights in between
Before these kids find Dexedrine
And this kingdom you're creating
Will be ruled under a PG rating

It's somewhere in between even and equal
Don't need a plot to make a sequel
But are we gonna find out now
When will we ever find out
Don't matter(?) place us on the basis of need to know

It's a video party sleepover
Yeah we're gonna stay up all night
It's a video party sleepover
Yeah we're gonna stay up all night

Could you see how I blushed
When our hands brushed?
