"Stay"

Visit "[Stay](#)" on MotoLyrics.com

You're the one who makes the world go round
I hope my dreams won't fall apart
You're the one like the wind you move along
Sail the ocean, day by day
Though she's never out on her own
She'll come inside me, takes me home
I've never been this far away
You're the one
You make me feel so young
Old enough to change your name
You're the one, shines so bright just like the sun
Every time you walk away
Though she's never out on her own
She'll come inside me, takes me home
I've never been this far away
Stay - never leave me - don't let me down
Stay - never leave me - don't let me down
Though she's never out on her own
She'll come inside me, takes me home
I've never been this far away
Stay - never leave me - don't let me down
Stay - never leave me - don't let me down
Stay - never leave me - don't let me down
Stay - never leave me - don't let me down
Never leave me you're the one
Never leave me you're the one
You're the one
