How are you feeling
Do you feel ok?
Cos I don't

It keeps me reelin'
Will I ever be the same?
No I won't

Its a cold day in a cold world
I really wished I could have saved you
Then who would save me from myself?
Right now, well, I could use a stiff drink
To kill the pain that's deep inside my bones

Have you been dreaming?
I don't dream at all
I have nightmares

Memories careenin'
Have you come to kill what's left
Of my smile

Theres no vacancy in paradise
I really wished I could have saved you
Then who would have saved me from myself
Right now, well, I could use a stiff drink
To kill the pain thats deep inside my bones
I really wished I could have saved you
Then who would have saved me from myself

I'll never forget you
I'll never forget you
I'll never forget you
I'll never forget you

I really wished I could have saved you
I really wished I could have saved you
I really wished I could have saved you
I really wished I could have saved you
