

## Daughtry "Overcrowded"

Visit "[Overcrowded](#)" on [MotoLyrics.com](https://MotoLyrics.com)

All places are overcrowded  
Decent life you thought you'll have  
Is buried under mountains of trash

We're born - we gain greed - we're born  
We spread around and breed

Wake up and take a look inside your life  
Useless and hollow  
What's the use, no future in sight  
Consume and devour

More and more you think you need  
Soon there is no room to live  
Realizing is the final call  
In a world like a self-made bomb

Suffering is the way you choose  
When you fuck and reproduce  
Earth's limits are closing on  
You will care when the day has come

Our way of life - overcrowded inside
