im wearing it, im wearing it  
under my face

my disgrace  
an expression and, an admission of  
i will try to give you something better  
but im sure i will make it ok

im wearing it, today  
but im sure i will make it ok  
i will try to give you something better  
you, with the grin on your face

me, with the bag in its place

i've put a rope round my neck  
im trying to win your respect  
conceal the weapons  
conceal the weapons  
death shares everything i have  
conceal the weapons  
conceal the weapons

but i hate the way i

conceal the weapons  
blame it on the staring match between the two of us  
blame it on the staring match between the two of us
