Raven (from the Lillywhite Sessions)

Rise and graze on this  
The future is a mess  
Oh, well you take this thing  
From us we give it in  
No longer yet, oh no  
Won't you got your thing  
I cheer then empty it from  
One over thing

One over thing  
Count out the radiant life  
Won't you give in light  
Out of a reason  
Let a light is run

Stone and gate is lay  
Hope you got your lips  
Live up to your dreams and give  
Wandering over them

Dark and tossed away  
Breach all yourself  
On love is out your head  
Gone and tossed away  
Leave the bent stick in and in

Oh I'll lay here  
Don't give up your down, down, down  
We don't need all  
Heaven's all underground  
Can we leave all  
The lord knows it's ours, it's ours  
Rain is empty receded  
I have to say it's nothing more than my point of view

This pride rains for a girl  
She slides across the floor  
And looks good as an angel  
Watch, I want some more

She's all needed to me  
Best thing I can come  
What's all been played with me  
The sweetest one of all  
The sweetest one of all

Come on Raven give it up  
Won't you give the light up  
I'm to waiting  
Here like a dead log  
When I say this I mean, aww  
Won't you go with your head  
Live life till you don't need in it  
But don't give up on it

All then tossed away  
Ah, don't you give up this little stray  
Gone, then tossed away  
Read, God is on the page

Pray on word have you say you get down, down, down  
Oh, we leave here  
We need more love round, around, around  
They won't let it go on, oh, man cower down below  
Here no worry to rest they say nothing more that I  
wouldn't do

Can leave us love to die, no  
Would you give your love?  
Rise up, you Raven  
If you like to live it down on it  
Won't let you down here, would you got  
Raise it up, to spread around the place

God got locked away  
No, don't place it in time  
We walk away  
Then rise up your wings  
Read the way out of the wars

Oh, my lady  
Oh all, in all around and round, round  
They don't let you

Freedom, Freedom, Freedom, Freedom, Freedom  
Oh, I won't be this  
I'm here to say it's  
Nothing more than my point of view
