I don't need from you a waterfall of careless praise  
And I don't need a trophy for all the games I played  
But all I want is your eyes  
In the morning as we wake for a short while

And I don't need you to catch my wandering mind  
And I don't expect a southern girl to know the northern  
lights  
And all I want is your eyes  
In the morning as we wake for a short while

And I do need the wind across my pale face  
And I do need the ferns to unfurl in the spring  
And I do need the grass to sway,  
yes I do need to know my place

yet all I want is your eyes  
in the morning as we wake for a short while
