I introduce you to my friends  
& that's the last I see of you  
All the world's discovered my big secret  
Everyone's in love with you

They're fascinated by your smile  
They copy all the things you do  
I wish that you & I could be together, but  
Everyone's in love with you, yeah  
Everyone's in love with you

God gives, God's wise  
The way that she smiles  
It should be no surprise  
At work, at home  
I'm introduced to so & so  
But you're the one they want to know

I'm jealous & a little proud  
I want to kill & kiss you too

You belong to everyone who meets you  
Everyone's in love with you

God gives, God takes  
Don't misunderstand I'm a satisfied man  
So sweet, so strange  
I guess I'll never understand the things she does to all  
my friends

I'm jealous & a little proud  
I want to kill & kiss you too  
You belong to everyone who meets you  
Everyone's in love with you  
Everyone's in love with you
