Sitting on the corner of the moon
Wishing you would get here soon
Whistling a lonely tune
Waiting for the next balloon

Reflections of the past are on my face
I don't know why I joined this race
Without you, I feel out of place
It's so lonely here in outer space

(CHORUS)

Babe, I'm the loneliest man on the moon
Spending my nights with the meteorites
Babe, I'm the loneliest man on the moon
Sharing my lips with a total eclipse
And I don't think you're coming back soon

The stars are falling down from the sky
Teardrops falling from my eyes
When I saw you wave goodbye
You were in a crowd, I was in a cloud

(CHORUS)

Cause I don't see another balloon

(CHORUS)

Babe, I'm the loneliest man on the moon
Sharing my lips with a total eclipse
And I don't think you're coming back soon
Cause I don't see another balloon

I'm the loneliest man on the moon
I'm the loneliest man on the moon
I'm the loneliest man on the moon
I'm the loneliest man
Loneliest man, loneliest man on the moon
