Tell me what you did to me  
Just underneath feet  
Didn't even notice we were miles above the ground  
I'm not afraid of heights  
We crashed into the sky  
Didn't know that I could feel the way that I do now  
I'm not asking for an explanation  
All I know is that you take me away  
And you show me how to fly

Nothing brings me down  
When you're around  
It's like zero gravity  
The world just disappears  
When you're here  
It's zero gravity  
When things get messed up  
I lift my head up  
And I get lost in the clouds  
There's no sense of time with you and I  
It's zero gravity

The edges fade away  
Till there's no more shades of gray  
You only have to whisper anything at all  
You opened up my eyes  
You turn my lows to high  
And that's the only way that I know how to fall  
Not gonna analyze or try to fight it  
Don't even care if it makes no sense at all  
'Cause with you I can fly

Nothing brings me down  
When you're around  
It's like zero gravity  
The world just disappears  
When you're here  
It's zero gravity  
When things get messed up  
I lift my head up  
And I get lost in the clouds

There's no sense of time with you and I  
It's zero gravity

You make it  
So easy  
To just drift away  
I can't  
Imagine  
Being without you

Don't think about it  
Don't think about it  
Don't think about it  
Don't think about it  
Don't think about it  
Don't think about it  
Don't think about it

Nothing brings me down  
When you're around  
It's like zero gravity  
The world just disappears  
When you're here  
It's zero gravity

Nothing brings me down  
When you're around  
It's like zero gravity  
The world just disappears  
When you're here  
It's zero gravity  
Zero gravity
