Girl I feel so empty since you left me
(Wanna see your face my girl)
it's like...
i don't even know how to explain
you see i'm sayin...?

Cause I'm so hurt and so angry
I didn't want to believe it
Your two eyes and your lips
Where I was living is telling me to leave you now
How can you say that to me?
I was so shocked that I let you leave

The memories of my love for you held me
Once happy words, made me cry
Even before i had a chance to ask you not to leave
you already turned and threw everything away
Even turning back the time that had passed and giving
all the pain that i gave you
If that only meant that you would stay with me
I'm content with that I'm content
Forever

Even if one day and one month passes, time is
pointless
Even if I listen to your voice without being able to say a
word
Saying that I'll forget you
How can I do that?
My so very edgy heart
Please dont leave me baby

The memories of my love for you held me
Once happy words, made me cry
Even before i had a chance to ask you not to leave
you already turned and threw everything away
Even turning back the time that had passed and giving
all the pain that i gave you
If that only meant that you would stay with me
I'm content with that I'm content
Forever

A stupid guy with only tears
Even if i stay like that,its impossible to forget you
I cant do anything about that
And every night
Again tears baby
Come back to me please

Yo..Listen
Saying you'll forget no way
I only think of you
That one picture I took with you
I cant end it and I look at the picture instead
If its not you
I cannot love again
I dont even want to and I just cant
It can only be you now
Please come back here

In a multitude of people I was able to protect you
I can live for you ma baby
Until now
My heart lost it's way and the owner of my heart is only
you ma lady
Without you I cant breath
Come back girl
I miss you so much
Cuz' your my love

Thank you for making me happy
Im sorry for not letting you love me
Facing each other with our hearts and giving them to
each other
Now we cant do anything in this situation
Even if I die I'll only love you
Even if I'm sick I'll only wait for you
You just have to return to me before then
I only love you,love you
Forever

Come on listen girl...
You're ma girl...
And that's my world....
Ya baby only one...
