You're one of a kind, I thought that You knew
Deep in our hearts there's this bright and shiny pearl
Down there in the dark, you follow it's rules
We hide it away from the weight of the world
Don't you let the world come and see
Don't let the strangers come and swim in our own little
Private sea

Chorus:

There's nothing wrong, there's nothing wrong with us
We get to love
And we cry when we get hurt
There's nothing wrong, there's nothing wrong with us

You wrote me a poem, return to my youth
Deep in my heart I was already yours
Fold me in half, take me with you
Take me away from the rest of the world

The rest of the world they can't see
There is a light pouring down over you and over me

Chorus:

There's nothing wrong, there's nothing wrong with us
We get to love
And we cry when we get hurt
There's nothing wrong, there's nothing wrong with us

There's nothing wrong, there's nothing wrong with us
We get to love
And we cry when we get hurt
There's nothing wrong, there's nothing wrong with us

There's nothing wrong, there's nothing wrong with us
We get to love and to last
And we cry when we get hurt
There's nothing wrong, there's nothing wrong with us
