People stand in line
People stand in line
People stand in line

A premonition of
The killers angel eyes
An Armageddon sky
Tell it like it is

It's like the old man says
We're dead in the water now
Dead in the water

They come from miles around
They come from miles around
They come from miles around

In avarice and love
To suckle on the blood
Of some forgotten God
Sell it like it is

It's like the old man says
We're dead in the water now
We're dead in the water now
Dead in the water

A simple act of faith
A simple act of faith
A simple act of faith

A celebration of
The color and the creed
The cancer and it's seed
Crackles on the mic

Call it what you like
We're dead in the water now
We're dead in the water now
We're dead in the water
