Verse 1:

Could it be
That I've just been struck by your electricity
Chemistry
I can feel her voltage radiate through me

Hey, no girl is better
Giving me a heartattack
I'm loving your swagger
When you're backing it up on me like that
You know that it's often
Just to look at what reacts
There's no turning back
I know have to leave with you, you, you

Chorus

You're overloading my senses
My system's defenses
My heart's in a stress when I'm next to you
There is no way I can prevent this
Your body's relentless
So let's make a move

Chorus:

Girl we can slip right out the exit exit exit
We can slip right out the exit exit exit
Tonight I'm gonna treat you, leave you breathless
But first we gotta exit exit exit

Verse 2:

Gotta go
There's an urgency this emergency can't hold
From the floor to the door
Let's knock it out like T.K.O

Hey no girl is better
Giving me a heartattack
I'm loving your swagger
When you're backing it up on me like that
You know that it's often

Just to look at what reacts

There is no turning back
I know have to leave with you, you, you

Chorus:

You're overloading my senses
My system's defenses
My heart's in a stress when I'm next to you
There's no way I can prevent this
Your body's relentless
So let's make a move
Girl we can slip right out the exit exit exit
Slip right out the exit exit exit
Tonight I'm gonna treat you, leave you breathless
But first we gotta exit exit exit

Bridge:

All night
Been thinkin' what I'm gonna do
Strobelight
Is busy setting up the mood
As soon as we can get inside
If you jump into my ride
The night isn't close to over

Chorus:

You're overloading my senses
My system's defenses
My heart's in a stress when I'm next to you
There's no way I can prevent this
Your body's relentless
So let's make a move
Girl we can slip right out the exit exit exit
Slip right out the exit exit exit
Tonight I'm gonna treat you, leave you breathless
But first we gotta exit exit exit
