"Twilight"

Visit "[Twilight](#)" on MotoLyrics.com

Another starless light
Another dim streetlight
Turn your head just right
Street becomes a sky

Shooting stars go by
They spark and they die
You see the reason why
You never catch them now

Drags along 'till light
Streaks of red vein the sky
But you love twilight

Oh, love me with your body
I need one to hold
Oh, love me with your body
I need one to hold tonight

In the long, dim light
Streaks of red vein your eyes
Don't you love twilight

Twilight, twilight, twilight, twilight
Twilight, twilight, twilight, twilight
Twilight, twilight, twilight, twilight

Twilight, twilight, twilight, twilight
Twilight, twilight, twilight, twilight
Twilight, twilight, twilight, twilight
