You said you're getting sick and tired  
Of me being gone  
Well you can set the bed for 2 babe  
Cause I'm coming home  
Unlock the door, I'll let myself in  
Just go wait for me, I won't be long, no  
No more thinking about your body  
No more boy I miss you  
Cause now I belong with you  
And we got time because

[Chorus]

When the sun comes up, till it's dark up in this room  
We'll be making love, baby it's your day  
From am to pm, I am yours 24, forever  
Your own, because it's your day

Don't even notice how the time is passing  
It went so quick from 6 to midnight  
How I, soon and we'll still be going,  
When it's this time tomorrow  
How the headboards are knocking baby  
This bed is gonna remember me and you  
And how we made it last all day  
No more thinking about your body  
No more boy I miss you  
Cause now I belong with you  
And we got time because

[Chorus]

When the sun comes up, till it's dark up in this room  
We'll be making love, baby it's your day  
From am to pm, I am yours 24, forever  
Your own, because it's your day
