

Day26

"All American"

Visit "[All American](#)" on MotoLyrics.com

My boss told me don't stay out too late Gotta be at work
by 9 or 9:15 He don't know I'm going to amputate all
my limbs and run around the place shave my head and
take the medicine off the shelves and drown what's
within red and white stripes and all the little things let
me know I'm all american

21 guns salute you when you die I'm not surprised

Build this shell to grow and function in stray from the
place that'll hurt me from within Pickin' up my pace
when it's appropriate Hide my face and disassociate
Fill this chapter with pieces of fiction left atomic from
the television radiation unstoppable chemical
infestation lets me know I'm all american

21 guns salute you when you die I'm not surprised

Drive my car to the local convenience store everything I
need lies right behind the door first aisle filled with
tabloid magazines no shirt, no shoes, don't steal
anything stuff my pockets with gum and anacin pay at
the counter and pay for everything red and white
stripes and all the little things lets me know I'm all
american
