

Day26

"American Holy War"

Visit "[American Holy War](#)" on MotoLyrics.com

Call in the troops an load up the bombs we are we are
we are we are marching to war and a war can't be won
we are we are we are we are my gun is pulled I'm lying
still can't see the enemy until I feel that bullet hit me my
gun is pulled I'm lying still can't see the enemy until I
feel that bullet hit me And they're sending all the young
ones out to the front all prepared to kill the different
colored one in their army green suit and brand new
shiny gun shoot the women and children and don't
spare anyone defend our investments in a foreign land
in the name of democracy capitalism plan upon the
shores wage the wars spill the guts onto the sand in the
fields we kill in the name of uncle sam wave the flag
wave the flag drop the bombs drop the bombs wave
the flag wave the flag drop the bombs drop the bombs
my gun is pulled I'm lying still can't see the enemy until
I feel that bullet hit me my gun is pulled I'm lying still
can't see the enemy until I feel that bullet hit me I
denounce this American holy war where a dollar is god
in god we kill in god we destroy to all the wasted lives
those who died those who died to all that gave their
lives those who died those who died one by one we are
all marching one by one did you want to inject them
with a global disinfectant try to cleanse and protect
them from themselves made the separation god and
state civilization go fuck all the other nations under
god under god
