No what the fuck
Have we done?
We cheated our way through
Existence.
Raise your eyes,
Look to the sky.
Fuck your god
Don't believe the lies.
Oh please let me break,
As clouds separate.
We feed off the dead
And now there's blood in the air.

(So let it rain down...)
I'll fly myself
From this dying planet

Now where the fuck
Do we run?
As demons fly
High above
So close your eyes
Prepare to burn
We're all dead
We'll never, never learn

Oh please let me break,
As clouds separate.

(So let it rain down...)
I'll fly myself
From this dying planet
(... of the memories)

Tonight I lost faith
In everything I hate
