

Days Difference "Burn Out"

Visit "[Burn Out](#)" on MotoLyrics.com

Was it over before it began?
Was it over? Did I misunderstand
The words you were speaking to me?
Cause I cannot bear to see your heart lying there

And the stars fall as your eyes turn
But I will stand by and watch you
Watch you, watch you

Is it easier to tell a lie?
Does it keep you in the right mind?
It is easier to sleep at night?
How can I save you from yourself?

And the stars fall as your eyes turn
But I will stand by and let you
Let you, let you

Walk out, burn out
Cause everything I do brings me back to you
Everything I do brings me back to you

Is it over now?
Is it over now?
Is it over now?
Is it over now?

Don't walk out, burn out
Cause everything I do keeps turning back to you
Everything I do keeps turning back to you
Everything I do leads me back to you
