

Days In December "Five Kings"

Visit "[Five Kings](#)" on MotoLyrics.com

Get down and get undercover
We call on all our heroes to tell us how to run to safety
Yeah, in the battle where we lie, we'll sing this battle
cry
We only know the poison will kill you

What's left for us is all, in the city
What's left for us is all that's left

And it feels like I'm blind
We cannot keep anticipating
When it's time to close your eyes
As it changes, nothing changes

Get undercover
I'll regret all these mistakes
In time it will become what saves me
Yeah, in the battle where we lie, we'll sing this battle
cry

We only know the poison will kill you

What's left for us is all, in the city
What's left for us is all that's left

And it feels like I'm blind
We cannot keep anticipating
When it's time to close your eyes
As it changes, nothing changes

We'll do this together
We'll guide you in
When all of this is over
You'll live to see it and die

And it feels like I'm blind
We cannot keep anticipating
When it's time to close your eyes
As it changes, nothing changes
