You take me to paradise  
And I feel as though I'm goin  
out of my mind, cant you see  
Every time I'm with you I feel weak  
Even though we're in a dream, oh I  
Can't last a day without  
your touch, your kiss  
Gently caressing my body  
My body is only for you  
Distant love, wish I  
knew how I met you  
I know I shouldn't waste  
time wonderin  
Is it you who yearns when  
I touch your skin  
So gentle, so gentle, I can feel you  
Tell me  
Tell me this is no lie  
I see you in the reflection  
of my eyes  
If your not here, please  
tell me where

Chorus

I know that you're out there  
(I can feel that you are close  
by your here somewhere)  
I've been waitin so long for you  
(Is life a dream, are things  
really what they seem)  
When I close my eyes you're here  
(Yo, I wanna hold you if only I could show you)  
Dreamings not like reality  
(Cause you're my destiny  
girl you know)  
Need you too

Is this a curse or am I blessed  
I think I'm going mad  
Up in this cold world

without my girl  
I visualize her daily because I am feeling incomplete  
without my lady  
I see things like her image  
Lurking in the mirror  
I'm fantasizing, wishing she were right beside me

But realising I am  
dreaming its an illusion  
So much confusion  
I'm crazy about this lady  
You haunt me, I have never met  
you but I can swear to god in my dreams I smell and  
touch you  
I long for you wanna hold  
you when I am lonely  
Cause in my heart you're  
the only one who knows me  
If only I could manifest  
your very being I could show  
you a part of me  
No girl has ever seen  
Believe me you're the only  
one in this whole world for me  
I know your out there so  
baby girl just wait for me

#### Chorus

I know that you're out there  
(I can feel that you are close  
by your here somewhere)  
I've been waitin so long for you  
(Is life a dream, are things  
really what they seem)  
When I close my eyes you're here  
(Yo, I wanna hold you if only I could show you)  
Dreamings not like reality  
(Cause you're my destiny  
girl you know )  
Need you too

#### Bridge

How will I know its you,  
so many faces in the world  
(Which on belong to you)  
Would you pass me by  
(If I don't say hi)  
Please leave a clue  
(I'll come find you and make

our dreams come true)  
I wont hesitate nor wonder,  
but please don't make  
we wait no longer  
(If I had my way you'd be  
here with me, I know its destiny, coz we we're meant to  
be)

Chorus

I know that you're out there  
(I can feel that you are close  
by your here somewhere)  
I've been waitin so long for you  
(Is like a dream are things  
really what you seem)  
When I close my eyes you're here  
(Yo, I wanna hold you if only  
I could show you)  
Dreamings not like reality  
(Cause you're my destiny  
girl you know )  
I Need you too x2
