"Angels"

Visit "[Angels](#)" on MotoLyrics.com

First came the wings, then the angel. His spirit actually appeared to you?

[Intro: Killah Priest]

Word, know what I'm sayin?

Straight up. I gotta talk to ya'll about angels right now.

(Don't be buggin) I dunno if you be knowing that you having them all around you?

Protecting you, angles, just wanna talk about angels.

Something different we ain't discussed

[Chorus: Killah Priest]

Yo, Angels (Angels) Eiloheim in the skies, fly with eagle wings

Angels (Angels) Eiloheim in the skies, fly with eagle wings

Angels (Angels) Eiloheim in the skies, fly with eagle wings

Angels (Angels) Eiloheim in the skies, fly with eagle wings

[Killah Priest]

First Genesis mislead us, fist of all we have to discuss who is the us

Who helped form the man from out of the dust

Who helped make the lands and fill the sea up? It was us

In greater form, we helped create a storm

That take newborns and embrace them in their arms

They hold hearts, and play god his favourite song

Touch the heart, and make it warm

They taught the preachers, they sit on ether

Some say they touch women in the bleachers give them seizures

They fight demons, they like creeping

Angels, they govern kingdoms

Yo c'mon

[Chorus]

[Killah Priest]

Angels, they bought the message from the heavens
Confused man about immaculate conception
They dressed in all black in their presence
They know the answers to mans questions, while he's
questing
The cherub form in the jeroboam
Man should cherish them, but don't worship them
Why? Cus they here to service men
Angels, they walk with plain clothes never let their
wings show

[Chorus]

[Killah Priest]

Angels, in which you imprisoned, show us visions
Play with the children, introduce us to women
They surround leaders, and politicians
Acknowledged by Christians, followed by wisdom you
can hear them
They could be around you right now, sitting with their
wings hidden
The ghosts of the night drifting
Float on the night skipping
Put my soul in conviction
Just listen to the energy, channels into the angels
C'mon

[Chorus]
