

De Rosa "Camera"

Visit "[Camera](#)" on MotoLyrics.com

I get the feeling I'm watching something
I've seen too many times before
Catching my way up to feelings
I could never pay them off

Provisional record my violence
Becoming red before teaching myself
And thinking I could never do it wrong

Camera, camera, camera, camera

Hold still, keep on riding too far
You ride it round in circles
When people get tired
They go ride it round in circles
People go away again

Now I'm feeling, 'In Situ'
It's something I could never work before
Working my way back to sane
This I could never be again

Follow what I never knew
I could direct a film
Or guard all that is sacred to me
I could shoot before the war
