Waiting for another death  
Every hour I'm trying  
Machines keep my brains alive  
Taking away my rest  
I, I've lived a life  
Full of hate, love and sorrow  
Why won't they let me die  
Let nature go its way  
Doctor trying to please my mind  
"Your life is saved by science"  
The only thing that's right for me  
Is death  
Lord, stop this torture, stop this life, I'm in pain  
Your son had to suffer only three days at the cross  
If your existence is real, please help me out  
Give me the right to pass away from this life  
What is this, money has no value anymore to me

I've worked so hard to earn a living for my wife  
Smash my head, suck my blood, destroy my brain  
Break my skull, stop my breathing, stop my pain

CHORUS:

Saved by science  
Saved by science  
Overkill, my soul has lost its life  
Carried away by tongs of Satan's son  
Hallucinate, the sun will cry  
Like doctor said, it's no longer matter of time

CHORUS

Cut my throat and watch me slowly die  
Salem's lot, cos nobody will cry  
Decadence, the process it is slow  
Saved by science, nobody will know
