

Dead Legend "Exhale"

Visit "[Exhale](#)" on MotoLyrics.com

You were always quick to blame
Though you made the same mistakes
It was easier for you to be hurt
Than to face what came your way
And every time I let you down
I was haunted by the sound
Of your exaggerated tears
No, I'll never live you down

So I exhale
I don't want to live this way
I'm breathing you out
On this cold and lonely day

So many times I tried to baid
I tried to let you go
I cursed the ground you walked upon
Just thought I'd let you know
That every time you let me down
I forgave and forgot
But now this pain I will not feel
You'll never break me down

You'll never break me now
Will I ever live you down?

Now that I've erased you
I don't ever want to face you
I just want you to go
I'm hoping you'll fade away

On this cold and lonely day
