

## **Death Before Dishonor "Endless Suffering"**

Pray - for death  
I can't stop longing for a release  
From this game of endless suffering  
Still I keep taking more of the pleasures  
That sustain illusion  
Drink my life away because I can't free  
Myself from the same day  
Just to have a taste of what I could have  
If I just fucking died  
Die in the arms - of the truth  
Maybe someday - I'll have the strength  
To just let go  
Close my eyes - slip away  
Sleep forever - escape the hate  
No - I can't escape the hate  
No escape I've fallen in love  
With feeling pain  
And nothing I can do can stop the hate  
A bitter man I stand to escape my fate
