Fuck all of your ways of submission  
Fuck your hopes and your dreams and your visions  
I will fight till I die till the tears flow from my mothers  
eyes  
Fuck all, your insurance and laws  
Blood will flow for the noblest cause  
Force your fear on the youth break their spirit and bury  
the truth

This is it, I'm tired of all your shit  
No more lies nothing left to hide  
So fucking sick of everything you stand for

Fuck you, I can see in your soul  
You don't have it you just play the role  
Here it is, on the streets  
Here I am you won't forget me  
Fuck you, see you acting so hard  
Act away but I'm pulling your card  
Play your games it's no use  
I will forge on and fight to break loose

This is it, I'm tired of all your shit  
No more lies nothing left to hide  
So fucking sick of everything you stand for

Just take a good look at yourself look at yourself  
Can't you see it's all coming down coming down  
Pay the price for the things you do  
Now no one cares for you
