guess who's calling  
guess who's speaking let's \_\_\_ as of now  
then happen four years of not being friends  
of not knowing what to think of this mess we made, it's  
lame  
but something over night  
should turn it all around  
like things been never said  
but i will not return  
and you will not lean back  
and drink to better days  
and guess who's not too happy  
stuck in a crappy job  
self restricted by \_\_\_ hypocrites  
i still can hate each and every one of them like before,  
you know  
but something over night  
should turn it all around  
like things been never said  
and i will not return  
and you will not lean back  
and drink to better times
