You don't know that there's been a change
The ending of what was the latest craze
You don't know, uh oh
You don't know, woah
Lets go! Lets go! They'll sing oh no the scene has died
All the cool kids they will cry
Over abused and multiplied
Now they know that the scene has died
Move on from, what you were
Now leave behind all the things that you were before it
was cool to change
Change your hair, change your clothes, change
everything about
(You will leave behind)
We were never there
